# Australian LNG capacity and exports

Source: Office of the Chief Economist

# Australian LNG supply to Asia

Australia is well placed to meet growing Asian LNG demand, given:

- large gas reserves;
- proximity to Asia;
- reputation as a reliable supplier
- Increasing productivity; and
- reputation as a stable investment environment

Australia will have 86 Mt capacity by 2020.

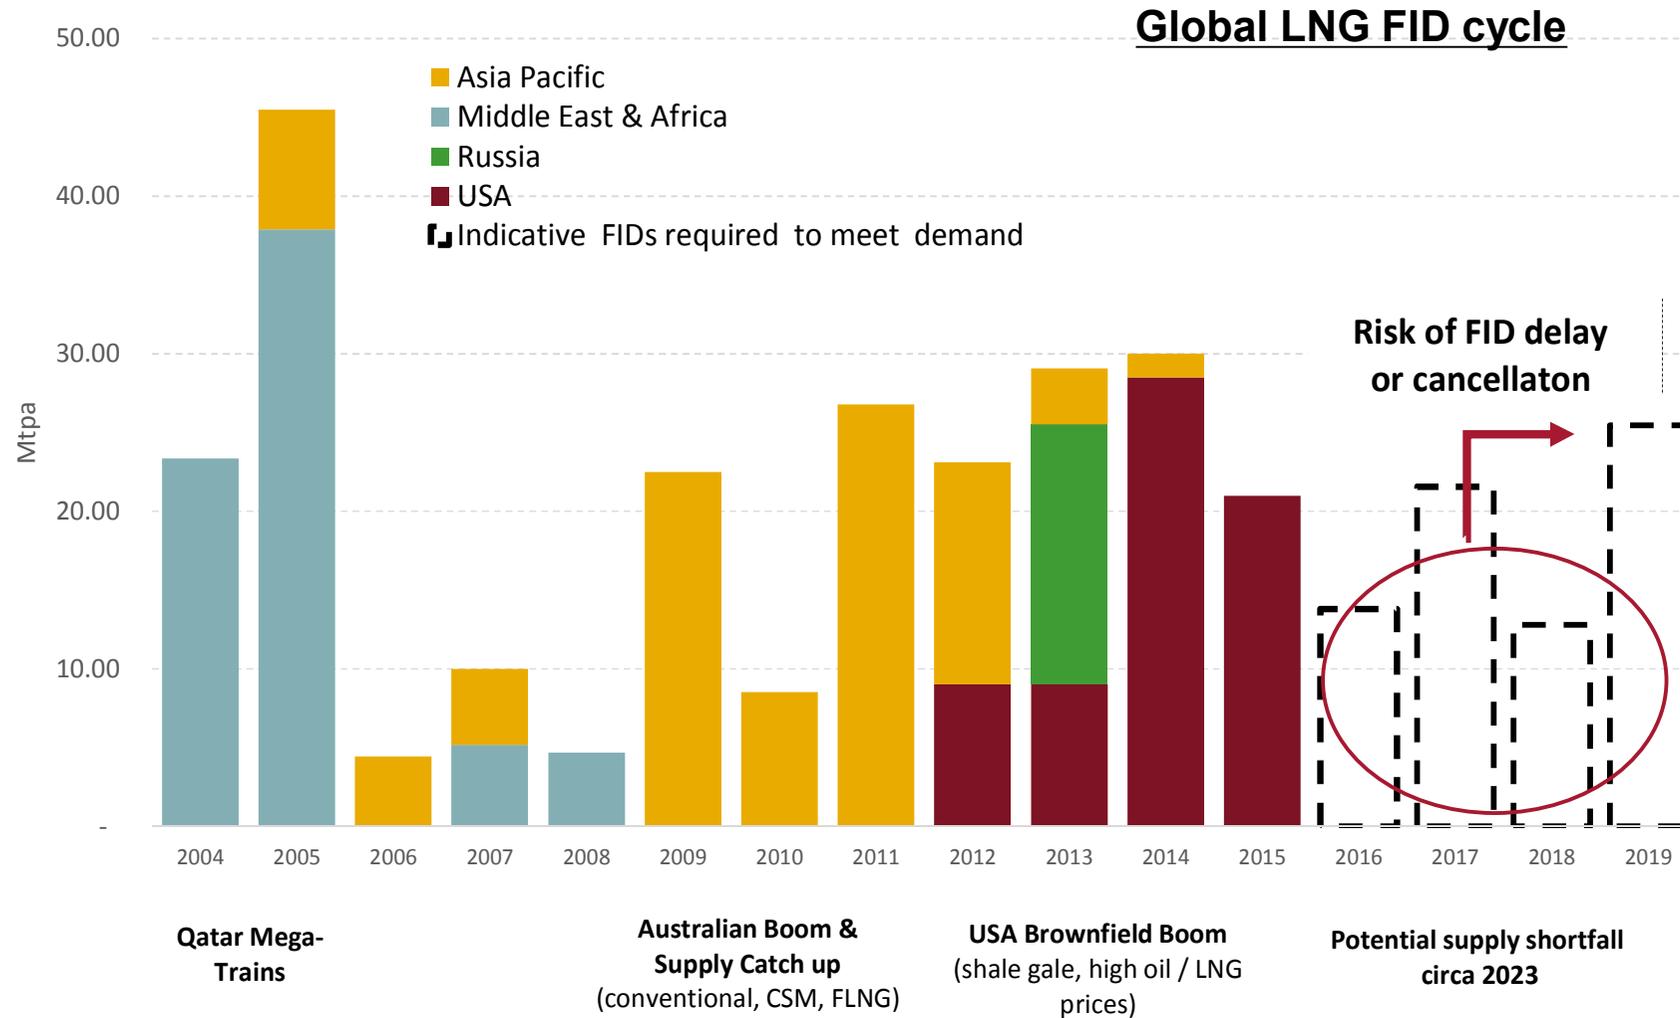

Where will supply to meet post- 2020 demand come from?

## Australia's projected LNG exports 2020

Source: Office of the Chief Economist

# Australia's competitiveness

\* Based on Wood Mackenzie supply demand outlook, 5-6 yr construction time
