

The 52nd Meeting of APEC Energy Working Group (EWG)
Moscow, Russia, 19-20 October, 2016

11.b. Conference on APEC Green Energy Finance

Takato OJIMI
President, APERC

APERC's role at the Conference

The conference took place over two days with five panel sessions

- Development Trends in Green Energy Finance
- Best Practices and Policy Sharing:
 - Economies' Perspective
 - Developers' Perspective
 - Institutions' Perspective
- Prospects for Cooperation in APEC

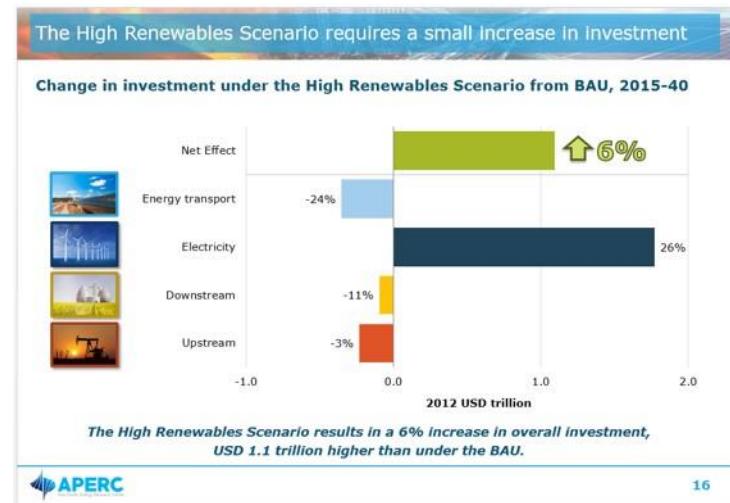

APERC made two presentations on the results of the 6th Edition APEC Energy Demand and Supply Outlook in the final session

- High Renewables and Improved Efficiency Scenarios: Pathways to Achieving APEC's Energy Goals
- APEC's Doubling Renewables Goal: Investment Implications

Conference on APEC Green Energy Finance
18-19 August 2016, Taipei, Chinese Taipei

High Renewable and Improved Efficiency Scenarios: Pathways to Achieving APEC Energy Goals

Michael Ochoada SINOCRUZ
Senior Researcher

APERC's role at the Conference

Benefits to APERC

- Opportunity to present the results of the 6th Edition APEC Energy Demand and Supply Outlook and promote APERC's research among members of the green energy finance community.
- Direct access to insights on new developments, policy opportunities and challenges in green energy financing in the APEC region from a multitude of stakeholders directly involved in project development.

Highlights of the Mission

- Key themes were how to scale up projects through information sharing, promoting term-sheet replicability, reducing policy uncertainty and supporting financial innovation.
- Development banks will play a crucial role in developing and demonstrating the business case for green energy projects as the industry attempts to prove commerciality to the private sector.
- Enhancing public-private partnership is seen as important to providing greater access to funds and accelerating the implementation of green energy projects.

Relationship with APERC's future work

Future projects at APERC

- APERC is working on an enhanced investment outlook for the 7th Edition APEC Energy Demand and Supply Outlook.
- A new research paper focusing qualitatively on the range of policies being implemented to encourage green energy finance across APEC economies.

Thank you for your kind attention
